

the  **Orangery**
the rio

the orangery the rio

With its flat roof it looks strikingly different from other orangeries, with the lantern visibly "sat" on top.

On the inside you will benefit from the same effect provided by the wide soffits, while you can remain confident that the building retains the structural integrity provided by our unique, highly versatile orangery aluminium system.

The Rio is a cost effective solution for a true orangery which makes no compromise when it comes to building standard regulations. You get a lot more than just what you see, and best of all, as for the whole range, it has been designed to ensure a fast installation, for minimum disruption.

features...

- Fully insulated warm roof construction (125mm insulation), available sloping or flat
- Deep (615mm (D) x 435/485mm (H)) internal plasterboard soffit
- Waterproof EPDM rubber membrane
- Aluminium/PVC decorative fascia

benefits...

- Project specific, easy to fit kit, no cutting or drilling of aluminium sections
- Structural and Heat Loss Calculations available
- Full technical drawings supplied
- Roof accessible for maintenance
